Business ROAS

FINAL RECOMMENDATION — MANAGEMENT SUMMARY

1. What's working? Google Search & Shopping (5–12x ROAS on 6.3% of spend) and 4 specific Meta campaigns running 2.0–2.2x with no fatigue.
2. What's not working? The 2 largest Meta campaigns (46% of budget) have seen ROAS fall by more than half since April. ₹1.42L sits in zero-return campaigns.
3. Winners: Google Search India (12.08x), Google Search INT (9.37x), Google Pmax HP EOSS (6.40x), Meta US Direct (1.97x, climbing), Meta TOF Sales India Open (2.12x).
4. Losers: Meta TOF Sale India (dead since June), Meta UK EOSS (0.81x), Meta INT Direct (1.11x), Google Pmax India 03-02 (0.05x), plus 9 zero-conversion campaigns.
 5. Increase budget: Google Search & Shopping across the board; Meta's 4 proven winners; a new retention/win-back campaign.
 6. Reduce budget: The 2 saturated Meta mega-campaigns, Meta INT Direct, Meta UK EOSS, Google's weakest Shopping campaign.
7. Why isn't the brand scaling? (1) Its 2 biggest campaigns are saturated from scaling too fast; (2) money is leaking into zero-return campaigns; (3) no retention motion despite 79% of orders being new customers.
8. Path to 25% growth: Reallocate from dead/saturated spend into proven winners (closes ~half to two-thirds of the required gap), launch retention, test new creative before scaling saturated campaigns further. Full 25% likely needs new creative validated at scale plus more time.
9. Top 5 actions: Kill zero-return campaigns → Refresh creative on saturated campaigns before scaling further → Shift budget into Google + proven Meta winners → Launch retention campaign → Fix Shopify traffic-source tagging.
